

USC TOF Update for July 26, 2007

Kevin Wilson
University of South Carolina

I am just a couple of hours away from finishing my TOFTempCorrector class. Once the code is complete, I will be able to test it against my beam track method of performing the correction for the center few bars. The code is in CVS in DSTAnalysis/TOF2007.

Plans for the near term:

- Testing!
- Crosstalk investigation
