

Update on FNAL Farms

Andre Lebedev
April 28, 2005

Model

- Head node gets files out of Enstore
- Data is posted to dfarm
- Job is submitted to a worker node
 - Get data from dfarm
- Resulting file is put to dfarm
- File extracted from dfarm by worker node, saved to Enstore

Progress

- Almost all of MIPP Software compiles
 - Still have issues with GEANT include path
- Connection to DB on e907ana1 ok
- Need to write a sample script to run a first pass
- Goal is to have something next week
